TOWN OF SUPERIOR

ORDINANCE NO. 3.03

ORDINANCE TO PROVIDE PROGRAM FOR PROTECTING THE PUBLIC WATER SYSTEM FROM CONTAMINANTS THROUGH THE WATER SERVICE CONNECTION INTO THE PUBLIC WATER SYSTEM – for Manitou Falls Sanitary District

WHEREAS, Chapters NR 810 and SPS 382, Wisconsin Administrative Code, require protection for the public water system from contamination due to backflow of contaminants through the water service connection; and

WHEREAS, the Wisconsin Department of Natural Resources requires the development and implementation of a comprehensive cross connection control program to effectively prevent the contamination of potable water systems;

NEW THEREFORE, BE IT ORDAINED by the Board of the Town of Superior, Douglas County, State of Wisconsin:

- 1. <u>DEFINITION OF CROSS CONNECTION</u>. A cross connection is defined as any physical connection or arrangement between two otherwise separate systems, one of which contains potable water from the Manitou Falls Sanitary District No. 1's public water system, and the other of which contains water from a private source, water of unknown or questionable safety, or steam, gases, or chemicals, whereby there may be a flow from one system to the other, with the direction of flow depending on the pressure differential between the two systems.
- 2. <u>UNPROTECTED CROSS CONNECTIONS PROHIBITED.</u> No person, firm, or corporation may establish or maintain, or permit to be established or maintained, any unprotected cross connection. Cross connections shall be protected as required in CH. SPS 382, Wisconsin Administrative Code.
- 3. <u>INSPECTION</u>. The Sanitary District may inspect, or arrange for an inspection of, property served by the public water system for cross connections. As an alternative, the Sanitary District may require a person, firm, or corporation who owns, leases, or occupies property to have their plumbing inspected, at their own expense, by a State of Wisconsin Certified Cross Connection Inspector/Surveyor. The frequency of inspections shall be established by the Sanitary District in accordance with Wisconsin Administrative Code. Any unprotected cross connections identified by the inspection shall be promptly corrected. Failure to promptly correct an unprotected cross connection shall be sufficient cause for the Sanitary District to discontinue water service to the property, as provided under Paragraph 6 of this ordinance.
- 4. <u>RIGHT OF ENTRY.</u> Upon presentation of credentials, a representative of the Sanitary District shall have the right to request entry, at any reasonable time, to a property served by a connection to the public water system for the purpose of inspecting the property for cross connections. Refusing entry to such utility representative shall be sufficient cause for the Sanitary District to discontinue water service

to the property, as provided under Paragraph 6 of this ordinance. If entry is refused, a special inspection warrant under Section 66.0119 of the Wisconsin Statutes, may be obtained.

- 5. <u>PROVISION OF REQUESTED INFORMATION</u>. The Sanitary District may request an owner, lessee, or occupant of property served by a connection to the public water system to furnish the Sanitary District with pertinent information regarding the piping systems on the property. Refusing to provide requested information shall be sufficient cause for the Sanitary District to discontinue water service to the property, as provided under Paragraph 6 of this ordinance.
- 6. <u>DISCONTINUATION OF WATER FOR VIOLATION</u>. The Sanitary District may discontinue water service to any property wherein any unprotected connection in violation of this ordinance exists, and take other precautionary measures deemed necessary to eliminate any danger of contamination of the public water system. Water service may be discontinued, however, only after reasonable notice and opportunity for hearing under Chapter 68, Wisconsin Statutes, except as provided in Paragraph 7 of this ordinance. Water service to such property shall not be restored until the unprotected cross connection has been eliminated.
- 7. <u>EMERGENCY DISCONTINUANCE</u>. If it is determined by the Sanitary District that an unprotected cross connection or emergency endangers public health, safety, or welfare and requires immediate action, and if a written finding to that effect is filed with the County Clerk and delivered to the customer's premises, water service may be immediately discontinued. The customer shall have an opportunity for hearing under Chapter 68, Wisconsin Statues, within 10 days of such emergency discontinuance. Water service to such property shall not be restored until the unprotected cross connection has been eliminated.
